Driving Revenue and Engagement: The Future of User Connectivity

01 About Stellaris Plus

Stellaris Plus is a Modular Applications Platform for Telco Industry offering highly entertaining premium applications with an extremely intuitive and user-friendly experience that encourages multiple daily use. The project was started in 2019 and is being developed by a passionate and experienced team of senior IT and Marketing professionals, resulting in a mature niche product for the Telco industry.

Our mission

Our mission is to support our partners, telecommunications operators, in expanding their service offerings through the implementation of our platform and associated applications with significant market potential. This strategy not only enhances user access to these applications but also leverages additional revenue streams, traditionally capitalized upon by platforms such as Google Play and Apple Store, in a more refined manner.
